### 募集要項

#### 1. ERP System Design and Implementation:

- Lead the design and architecture of the ERP system, considering organizational needs and industry best practices.
- Collaborate with key stakeholders to gather and analyze requirements, ensuring alignment with business objectives.
- Oversee the implementation of ERP solutions, providing guidance to development teams and ensuring adherence to architectural standards.
- Provide technical leadership, mentorship, and guidance to technology teams, fostering a culture of innovation, collaboration, and continuous improvement.

#### 2. Integration and Interoperability:

- Design and implement integration solutions between ERP and other business systems, fostering seamless data flow and communication.
- Evaluate and recommend third-party applications or tools to enhance ERP functionality and interoperability.
- Identify potential technology risks and develop risk mitigation strategies to minimize exposure to operational disruptions.

#### 3. Performance Optimization:

- Continuously assess and optimize the performance of the ERP system, identifying and resolving bottlenecks or inefficiencies.
- Collaborate with infrastructure and database teams to ensure the scalability and reliability of the ERP architecture.
- Define and monitor key performance indicators (KPIs) for technology solutions, evaluating their performance and suggesting improvements as needed.
