募集要項

[About the company]

The company provides website customer attraction support services, website management support services, and media services aimed at solving issues faced by small and medium-sized corporate clients.

As main services, the company is committed to solving clients' problems with SEO service Find-A, ad serving service ADSolution, area ad service Video Flyer, search result ranking checker tool GMO Rank Checker, and RPA agency Digital Laborer Jim.

[Job Description]

As a Web Application Development Engineer, you will be responsible for the following tasks

[Responsibilities]

- Development, operation and maintenance of SEO tools and listing ad operation tools provided as SaaS for SMB customers.
- Development and operation of the tools, including the development of functions and UX in cooperation with the planning team and data analysis team, so that users with little knowledge of web customer attraction can use the tools.
- Your area of responsibility will be determined based on your experience, areas of expertise, and preferences, such as being good at front-end or back-end development.

[Technology Stack]

OS : Linux (CentOS series)
 Front-end: HTML, CSS, JavaScript, TypeScript, React
 Backend: PHP, Laravel, Python, Django, Node.js, GraphQL, Go
 Infrastructure: AWS (more than 90%), GCP
 Middleware: nginx, AWS Lambda, AWS SES, AWS SQS, etc.
 Database: MySQL, AWS Aurora (MySQL), AWS S3
 Monitoring: Zabbix
 Environment construction: docker, ansible
 Containers: AWS ECS Fargate, AWS ECR
 Source control: Github
 CI/CD: CircleCI, Github actions
 Others: Redmine, Slack

■Department: System Department 1st & 2nd Development Groups

You will develop a variety of in-house tools for this company that provides services to solve web customer attraction issues faced by small and medium-sized businesses (SMB), which account for 99.7% of all companies.

■Comments from a recruiter

The Development Group of the Systems Department develops and operates a variety of tools, but as it is still a small organization, roles are not limited. This is an environment where you can acquire full-stack web skills, including infrastructure as well as applications. Also, since it is an in-house service, you can be involved in upstream processes such as requirement definition and system design as a party to the business and service.

[Working conditions]

< Welfare >

- Qualification allowance
- Memorial and condolence payment system
- Long-service awards
- MVP award (worth 1 million yen)
- Various types of social insurance (employment, workers' compensation, health, corporate pension fund)
- Health insurance association recreation facilities (4 directly managed facilities, approx. 9,000 contracted facilities)
- Life plan support (employee stock ownership plan/defined contribution pension plan)
- Free communication space, café (available 24 hours a day)
- Childcare, massage, nap space, childcare counseling
- Health care counseling
- Nursing care leave system
- Club activities
- Casual clothes OK
