[Four. System Engineering Service (SES) Business]

To provide IT engineers for client in-house system development on a customer-resident basis.

All business incidental to the above

[About the Job...]

The company has strength in voice technology.

The company has achieved stable growth in the BtoB market with its technology for DXing telephone communication between companies, which are customers, and consumers, which are customers of the company.

They also possess big data of actual conversation data between client companies and their customers, the consumers.

As the company enters its second founding phase, they hope to transform this big data into core technology using AI-related methods such as machine learning and deep learning, and aim for further development.

In order to create products that are truly useful to users by automatically analyzing accumulated voice data, you will collaborate with the PM and development team to turn research results into products and services.

◆ Attractiveness

[Rapid Product Release Experience]

The company developed and released MediaTalkGAI, an AI chatbot based on ChatGPT technology, in [1 month], the fastest level in the industry.

In a flexible and speedy development environment with a small elite team, you can work to create new functions and services that are truly needed from the customer's perspective.

[Diverse Project Experience]

By working on in-house developed AI services, you will have the opportunity to experience a variety of AI technologies, from natural language processing (NLP) to voicebots using voice recognition AI technology.

In addition, the company's first priority is to discover and solve its clients' essential problems.

The company takes a proactive stance in verifying and utilizing the latest AI models necessary to achieve this.

[Grow as a full-stack engineer]

You can hone a multifaceted skill set, from front-end JavaScript to back-end Python, and even building infrastructure using AWS.

[Open communication culture]

The company values communication with engineers in the same industry, both internally and externally.

There is an environment in which you can actively grow through participation in the large-scale AI event "AI CHAT SUMMIT 2023" hosted by the company, as well as in communities of engineers who develop and provide the latest AI services.

[Working hours]

10:00~19:00

[Benefits]

- Full Social Insurance
- Commuting Allowance
- Telecommuting System
- Training/Self Development Allowance
- Full overtime allowance

- Business trip subsidy (transportation + travel expenses paid)
- Company housing rent subsidy (when contracted through a partner real estate company)
- Celebration and condolence money (wedding gifts, etc.)
- Job title allowance
- Qualification acquisition system (lump-sum payment upon successful completion)
- Recognition system (monthly MVP/annual MVP)
- Childcare and parental leave system

[Holidays]

- Saturday/Sunday/National Holiday
- Annual Paid Leave
- New Year Holiday
- Parental Leave

スキル・資格

[Required]

- ・ 2+ years of knowledge and working experience in AI development programming languages such as Python or C++.
- ・ Knowledge and experience in natural language processing.

[Preferred]

- ・ Knowledge of GPT-3.
- ・ Master's degree in information engineering/mathematics or equivalent work experience
- ・ Experience in research or development related to machine learning and deep learning.

[Ideal Applicants]

- ・ Able to think theoretically
- ・ Able to communicate with other members of the team while conducting research and development
- ・ Always learn new knowledge and experience, and use it proactively
