募集要項

【ABOUT THE COMPANY】

Under the slogan of "360° Digital Integrator," the company provides multifaceted DX support to its clients through web system development, web production, UIUX design, web marketing, consulting, growth hacking, and more.
In web system development, they use agile development to handle a wide range of projects, from mission-critical large-scale scratch development to speedy construction using SaaS and SaaS-to-SaaS collaboration.
They are also active in UIUX areas that have not yet been established in Japan, with a rapidly expanding design team, challenging branding business, and being certified as a platinum partner in global platforms such as Hubspot.
It is still a start-up company with 60 employees, but will continue to expand toward 100 and 300 in the future.

They are actively involved in projects in areas related to the Sustainable Development Goals (SDGs), regional development projects of local governments, projects involving the Ministry of Economy, Trade and Industry and other public agencies, and projects in education, healthcare, and other industries with high public and social responsibility, which currently account for approximately 60% of sales.
In order to be a company that is chosen by society and by the people, they want to get into the middle of capitalism while ensuring social contribution and public nature, which have a strong image of non-profit.
This is a challenge that they can take on only as a start-up company.

【JOB DESCRIPTION】

【Responsibilities】
Forecasting and resource management
Member management
Website implementation using HTML/CSS/JavaScript/React and other front-end technologies
Technical support for building e-commerce sites on Shopify
