募集要項

【ABOUT THE COMPANY】

The company operates a web3app, SocialGoodApp (English version), which is deployed in 200 countries around the world and is growing rapidly with a cumulative DL of over 2.4 million users and a 6-fold increase in sales over the previous year. Last year, the company raised 1.42 billion yen to invest in the development and marketing of the app. The company is aiming to be listed on the NASDAQ in the US. The target market is 700 million people worldwide, and they currently have the No. 1 market share in this field, and are aiming to ride the wave of the growing crypto market and become the No. 1 app in the world in terms of users. The members of the company are a small elite group, and from the Tokyo office, they are dealing with the global market, focusing on the U.S., Europe, Southeast Asia, and other regions.

[JOB DESCRIPTION]**[Recruitment Background]**

With the vision of 'creating the world's largest virtual currency and mobile app with the most users in the world', the company aims to create the world's largest global platform and make all people financially free. They are looking for an engineering manager for the core business, smartphone apps, in order to move into a new phase now that the number of users around the world is rapidly increasing.

[Growth and environment you can experience]

- Global expansion of Web3 Shop to Earn service, backed by novelty and uniqueness with more than 70 patents
- A stimulating environment where you can work with the CEO, a serial entrepreneur from Mitsui, and talented members from companies such as Mercari and Amazon Japan.
- A global workplace where 80% of employees are from overseas

[Responsibilities]

- Formulation and management of development plans based on product roadmaps
- Management of development projects
- Evaluation and training of development team members
- Architecture design and review
- Leading and handling of production operation issues
- Development organization enhancement and recruitment

[Attractiveness of this position]

- You can grow as an engineer by being involved in the development of globally expanding services
- As a member of the core team, you will have the opportunity to take an active role as a leader in an expanding team.
- You can work in a dynamic office designed by a designer who has worked on office designs for Google and other companies.
- You can choose which PC you use for your work.
- You can work in multiple areas at the same time without being restricted to one specific area.

[Working time]

10:00 ~ 19:00

[Welfare]

Full Social Insurance
 Stock Option
 Commuting Allowance
 Training/Self Development Allowance

[Holidays]

Saturday/Sunday/National Holiday
 Annual Paid Leave
 New Year Holiday
 Parental Leave
 Nursing Care Leave
 Summer Holiday

スキル・資格**[Required]**

- Extensive experience as a software engineer in product development and operations
- Experience in leading development teams in a rapidly changing and growing organization
- Strong communication skills across departments and hierarchies
- Business level English and Japanese language skills

[Preferred]

- Experience in developing automated scenario testing based on user stories (Automated QA Testing)
- Experience leading a team of 5-10 engineers in application development
- Experience in creating user stories and managing product backlogs
- Experience with mobile attribution tools (Amplitude, Adjust, Leanplum)
- Understanding of blockchain (ERC20)

[Ideal Applicants]

- Desire to work in an environment that supports the recruitment and growth of employees and their abilities through their work.
- Desire to further develop my skills in a start-up company that aims to be the world's No. 1.
- Willing to take on the challenge of leading a group of talented engineers
- Have a desire to create high quality products
