募集要項

【About the Company】

The company constantly wants to create new value and deliver it to the world in the form of businesses and services.

The company (client), the sender of products and services, and the consumer (customer), the recipient, are connected by new interactions and are creating a place for both people to meet each other.

From big choices of life such as going to school, employment, marriage, and residence, to everyday choices such as booking travel, beauty salons, restaurants, etc., users can eliminate various inconveniences and anxiety in their own life. They provide matching services that connect individuals and companies. In addition, by providing various business support services that utilize technology to clients, they are pursuing digitization of business and information (which used to be analog management) and trying to increase industrial productivity.

[Business description]

Management/business promotion of the media and solution business, a unit that integrates domestic and overseas promotional media business, Japanese HR technology and global staffing services.

[About the Job...]

[Overview]

The use of public clouds is increasing in the services of the company group. In order to meet these needs, you will be responsible for the standardization of multiple public clouds for the company group, the operational design and operation of the standardized cloud infrastructure, and the design and construction of individual projects using the standardized clouds.

[Job Details]

You will be responsible for designing the standardization of multiple public clouds for the company's group, building an environment that covers multiple aspects such as IDs, permissions, and security, and then operating the standardized public cloud infrastructure to promote its use within the group.

In addition, you will be responsible for responding to individual projects and consultations from within the group, and depending on the project, you may be involved in the planning, design, and construction of the service, and work as a solution architect to assemble the service while incorporating cloud functions.

[Working hours]

Flextime System

[Benefits]

Full Social Insurance
Commuting Allowance
Retirement Allowance
Employee Shareholding System

[Holidays]

◆ Annual holiday 130 days (company holiday 125 days + designated holiday 5 days)

■ Retirement lump sum system

Severance pay for employees who have been with the company for less than 5 years. The amount of payment varies depending on the length of service

(6 months or less: not paid, 6 months to 1 year and 6 months: 200,000 yen, 1 year and 6 months to 3 years and 6 months: 400,000 yen, 3 years and 6 months or more: 1,000,000 yen)

■ Frontier system

A subsidy for the purpose of supporting career development after retirement for those who have been working for 5 years or more. As a support fund, we will provide the equivalent of one year's annual income

スキル・資格

[Required]

■ Experience and Professional Background

1. Experience in large scale public cloud operations (AWS, GCP, Azure, etc.)
2. Experience in operating not a single service but multiple services

[Preferred]
