募集要項

【About the Company】

〜Japan's largest group of engineers working on cutting-edge projects for major manufacturers.

An engineering solutions company with more than 7,000 professional engineers.

The company gets into the "core of technology" of every manufacturing industry and is responsible for the design and development of new products that have yet to be seen anywhere else in the world. In this era where the required technologies are constantly changing, you can live strongly as a person who is at the "core" of the technology, standing at the forefront of technology.

The areas in which you will be involved include aircraft, rockets, automobiles, industrial robots, medical equipment, and home appliances. They offer a wide variety of projects so that you can choose the field where you can grow the most. We believe that you should always aim to go one step higher.

You will live your whole life as a professional engineer. We want you to have a career where you can do anything you want with a variety of experiences.

This is what you can achieve at the company.

【Job Description】

Development of various applications for PC, Web, and information terminals, construction, operation, and management of databases, networks, and servers, etc.
