### 募集要項

#### 【About the company ...】

【Proactively promote the optimization of the development environment (Developer Experience) using state-of-the-art technology.】

With IT investment in full swing among major corporations, the company is tackling the construction of web services using

cutting-edge technology, leveraging its know-how cultivated in the financial sector and the stability of a group listed on the first section of the Tokyo Stock Exchange.

◆ You can increase your market value by pursuing cutting-edge technologies.

At this company, you can be involved in the development of innovative systems such as FinTech and PWA using AI technology and big data, and challenge upstream processes such as planning proposals, process and quality management, and requirements definition.

◆ You can gain experience in the BtoBtoC field!

The company aims to update Japanese system development in the BtoBtoC field and refine DX. They aim to update Japanese system development in the BtoBtoC field and refine DX. For example, they are working on a wide range of projects such as websites for major mobile services, ticket sales and video distribution for professional baseball, and electric power services.

◆ Guaranteed to exceed your current income! Your skills will be returned to your income.

Your efforts to improve your skills will lead to higher income. The company pays a financial bonus every year, and 100% of overtime is paid separately. If you work on internal improvements, you will receive a separate allowance.

—Why don't you pursue new technologies and become an engineer who is ahead of everyone else?

[The company will actively recruit more than 30 people]

Since its establishment in 1998, the company has been undertaking the development of business systems for major financial companies and major manufacturing companies. In March 2019, the company became a member of a group of companies listed on the first section of the Tokyo Stock Exchange, and requests from major clients are increasing. In the second stage of their business, they are planning to increase the number of engineers further in order to develop their own products and start projects using cutting-edge technologies. They are now looking for 30 people who want to develop their skills and career in a growing company.

### [ Job Description ]

As a PM, you will lead a variety of development projects.

#### ■ Responsibilities

- Upstream process support for projects (system planning, technology selection, requirement definition process)
- Proposal preparation, proposal activities
- Overall project management, team formation, budget management
- Duties as stipulated by the company

[About PJ Scale]

Small scale 3-10 people, medium scale 10-30 people, and large scale 50 people and up.  
You will be assigned according to your experience.

◎ Many prime projects!

Acquisition of projects through introductions from group companies, etc. Participating in many big projects worth hundreds of millions of yen.

This is an environment where you can work with a sense of fulfillment.

◎ Diverse industries!

Due to the increase in prime projects, there is a wide variety of industries in which to work.

You can take advantage of your experience and knowledge, and of course, you can take on new challenges.

◎ Providing a Stress-Free Environment as Much as Possible

One of the company's features is to provide a stress-free environment. Standard development PCs have at least 32 GB of memory.

Environment aspects are set up with priority given to the specifications required by each engineer.

The environment is flexible enough to use Mac, dual monitors, and any other necessary software and tools.

The company believes that ensuring maximum quality and productivity is important for engineers.
