募集要項

Responsibilities:

- Understand current processes of the Manulife Japan application development and delivery.
- Find areas to explore for improvement, analyze the problem landscape and come up with solutions.
- Propose solutions to stakeholders and get buy-ins.
- Implement and rollout solutions with various parties at the mindset of cross-functional team.
- Document key information and share knowledge to uplift the engineering culture.
- Measure the effectiveness of solutions and keep improving.
- Carry out above activities with minimal guidance and supervision.
- Report and share the status of your activities and escalation when requires attention.
- Self-directed, self-motivated, self-starter and does not procrastinate.
- Be a creator with insight, not an order taker.

スキル・資格

Required Skills:

- 15+ years of IT domain, and 5+ years similar experience.
- Understanding of: DevOps framework and relevant processes, CICD tools/pipeline, Database, Web Application, Web Services, Micro Services/API.
- Experience with Cloud technologies like Azure, AWS, GCP, as well as dynamic resource management frameworks such as Kubernetes, Mesos.
- A proactive approach to identifying problems, areas for improvement, and performance bottlenecks.
- Knowledge of financial services, specifically the Insurance industry.

Desired Skills:

- Strong verbal and written communication skills and ability to present, persuade and influence peers and vendors.
- Previous success in technical engineering or application support.
- Ability to program (structured and OO) with one or more high level languages, such as Python, Java, C/C++, Ruby, and JavaScript.
- Experience with one or more of the following: Experience with Agile (Scrum or Kanban), Jira and ServiceNow, Jenkins, Bamboo, Maven, Git, BitBucket, Artifactory.
- Strong verbal and written communication skills and ability to present, persuade and influence peers and vendors.
- Proficient or above in Japanese and English.
