## 募集要項

We are currently a global company with more than 500 foreign engineers (from 50 countries).

Development and implementation of customer solutions for various industries such as IT, manufacturers, finance, services, etc. You will analyze the data, implement algorithms, create predictive models using machine learning (decision tree, logistic regression, random forest, naive bayes classifier, k-NN, k-means or neural network), build a hypothesis using statistical analysis and clustering.

### 【Project examples】

- Create a predictive model of sales trends in machine learning by weather change
  - Data analysis using the access log data
  - Implement the assignation optimization system for HR team
- 

## スキル・資格

### 【Qualifications】

- Hands on experience of data science
- Experience using Python or R
- Bachelor's or higher degree in Computer Science, Information Technology, Statistics or Mathematics

\*Please be sure to attach a resume in Japanese or English when applying.
