募集要項

We are seeking a highly skilled Senior Network Engineer to develop and implement network strategies across multiple offices. The ideal candidate will have extensive experience managing on-premises and cloud-based servers, workstations, and network devices. This role requires hands-on work with executives and users to meet their IT needs, ensuring the

security and efficiency of our network infrastructure

Responsibilities:

- Install, configure, and maintain network equipment, such as routers, switches, firewalls, UPS's, and other hardware.
 - Package and ship configured equipment to remote sites, when necessary.
 - Monitor network performance to ensure optimal operation.
 - Troubleshoot network issues and outages promptly.
 - Maintain network security protocols and measures to protect the network against unauthorized access and data breaches.
 - Enforce security policies and access controls.
 - Perform regular network maintenance tasks, including updates and patches.
 - Implement network infrastructure to meet organizational needs.
 - Stay updated on industry best practices and emerging technologies.
 - Manage network-related software, such as operating systems and network applications.
 - Maintain inventory of network assets and their configurations.
 - Provide technical support to end-users regarding network-related issues.
 - Test and update configuration backups regularly to ensure data integrity.
 - Maintain accurate records of network configurations, changes, and incidents.
 - Maintain network schematic diagrams.
 - Prepare reports on network performance, security, and usage.
 - Interact and negotiate with vendors, outsourcers, and contractors to secure network products and services are delivered in line with expectation to ensure successful delivery of services.
 - Follow company procedures and ITIL best practice for Change, Incident, Capacity and Problem management.
 - Ensure that the network infrastructure complies with industry standards and regulatory requirements including but not limited to FDA, SOX, ISO regulatory authorities.
- Coordinate, prepare and respond to all IT audit requests and resolve any audit findings.

スキル・資格**Knowledge,Skills & Abilities Required:**

- Minimum 3 years' experience in a Deskside role with basic knowledge of Layer1-3 Networking protocols.
- Applied technical knowledge of current network hardware, protocols, and Internet standards, including the OSI model and TCP/IP.
- Experience of Data Centre environment, Nexus Switching, and F5 load balancing desirable.
- Experience of delivering network infrastructure in a regulated manufacturing environment and manufacturing systems desirable.
- Experience of cloud networking desirable.
- Experience of deploying SD-WAN desirable.
- Applied knowledge of applicable data privacy practices and laws.
- Experience working in multinational company/environment desirable.
- Current Cisco CCNA, CompTia Network+ or equivalent professional certification are desirable.
- ITIL v3 foundation or higher qualification desirable.
- Oral/Written Communication Skills: Fluent Japanese & English languages
