## 募集要項

Join an innovative team focused on the development, operation, and support of Kubernetes container platforms within a private cloud. This role offers a unique opportunity to blend infrastructure engineering with software development.

**Client Details**

Our client is a leading, globally recognized organization known for its robust infrastructure and commitment to technological innovation. With a diverse and international team, they provide an exciting environment where employees are encouraged to grow, innovate, and make a significant impact in their field.

**Description**

- **Operation:**
    - Cluster/Node provisioning and management.
    - Handle alerts, incidents, and security requirements.
    - Conduct OS/Middleware updates and manage midnight releases.
    - Create and maintain operation manuals and perform risk analysis.
- **Development:**

- Design and propose infrastructure solutions, including auto-provisioning and auto-upgrading of clusters/nodes.
- Develop self-healing systems for infrastructure stability.

- **User Support & Migration:**
  - Provide advanced support for complex user cases and assist in migrating legacy platforms to new cloud solutions.

**Job Offer**

- **Professional Growth:** Opportunities to work with cutting-edge technologies and platforms, alongside a team of global experts.
- **Cultural Exposure:** Engage with a diverse, multinational team, broadening both your technical and cultural perspectives.
- **Compensation:** Competitive salary with additional benefits, including support for professional certifications and career development.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Naoko Toda at +81 3 6832 8648.

## スキル・資格

- Holds a CKA certification (or willingness to obtain within 3 months).
- Strong expertise in Kubernetes, containers, and Linux, with experience in large-scale system operations (100+ servers).
- Proficient in software development using GoLang or Python, with a deep understanding of networking and distributed systems.
- Able to thrive in a structured corporate environment with strict adherence to top-down orders and operational processes.
- Business level English/ No Japanese language requirements.

## 会社説明

Our client is a leading, globally recognized organization known for its robust infrastructure and commitment to technological innovation. With a diverse and international team, they provide an exciting environment where employees are encouraged to grow, innovate, and make a significant impact in their field.
