募集要項

【ABOUT THE COMPANY】

Although the number of employees is around 100, the company has achieved increased sales and profits for the 11th consecutive year, and they have also been listed on the first section of the Tokyo Stock Exchange. Their location-based game involving railway stations have aquired a lot of fans, collaborated with major railway companies, and have had a major impact on the economy around the stations. They have started building a blockchain platform recently, and they have a great potential to grow further.

【JOB DESCRIPTION】

You will be in charge of the development of the company's "Ekimemo!" which is provided by our company. Engineers will be involved in the implementation and design of the entire web application, from server side to DB and front end, depending on their areas of expertise and the challenges they wish to take on.

In addition to engineers, designers and product managers will work together to improve and develop the service.

■Responsibilities
Design and implementation of product logic, DB, UI, etc.
Operation and improvement of products, etc.
In order to promote efficient development, the company organizes small teams including planners and web designers for each project, and adopts various agile development methods such as code review and test-first.
