募集要項

Position: Embedded Lead
Location: Yokohama
Language: N3 and above

Job Description:

Responsibilities:

- Design and develop automotive software applications based on the AUTOSAR standard.
- Configure and integrate AUTOSAR Basic Software (BSW) modules, including RTE, communication stacks, and micro-controller drivers.
- Collaborate with system engineers and other developers to define and implement software requirements.
- Perform unit and integration testing of AUTOSAR software components.

- Understand and apply AUTOSAR specifications, methodologies, and tools.
 - Maintain and document AUTOSAR code and configurations.
 - Stay up-to-date with the latest AUTOSAR developments and trends.
 - May participate in customer meetings and provide technical support.
-

スキル・資格

Qualifications:

- Bachelor's degree in Computer Science, Electrical Engineering, or a related field.
 - Minimum of 5 years of experience in embedded systems development.
 - Strong understanding of C programming and embedded system concepts.
 - In-depth knowledge of the AUTOSAR standard (AUTOSAR 4.x or later preferred).
 - Experience with AUTOSAR configuration tools (e.g., Vector DaVinci, EB TresOS).
 - Familiarity with real-time operating systems (RTOS) concepts.
 - Experience with automotive communication protocols (e.g., CAN, LIN, FlexRay, Ethernet).
 - Excellent analytical and problem-solving skills.
 - Strong written and verbal communication skills.
 - Ability to work independently and as part of a team.
-
