### 募集要項

**Position:** Embedded Lead  
**Location:** Yokohama  
**Language:** N3 and above

#### Job Description:

##### Responsibilities:

- Design and develop automotive software applications based on the AUTOSAR standard.
- Configure and integrate AUTOSAR Basic Software (BSW) modules, including RTE, communication stacks, and micro-controller drivers.
- Collaborate with system engineers and other developers to define and implement software requirements.
- Perform unit and integration testing of AUTOSAR software components.

- Understand and apply AUTOSAR specifications, methodologies, and tools.
  - Maintain and document AUTOSAR code and configurations.
  - Stay up-to-date with the latest AUTOSAR developments and trends.
  - May participate in customer meetings and provide technical support.
- 

## スキル・資格

### Qualifications:

- Bachelor's degree in Computer Science, Electrical Engineering, or a related field.
  - Minimum of 5 years of experience in embedded systems development.
  - Strong understanding of C programming and embedded system concepts.
  - In-depth knowledge of the AUTOSAR standard (AUTOSAR 4.x or later preferred).
  - Experience with AUTOSAR configuration tools (e.g., Vector DaVinci, EB TresOS).
  - Familiarity with real-time operating systems (RTOS) concepts.
  - Experience with automotive communication protocols (e.g., CAN, LIN, FlexRay, Ethernet).
  - Excellent analytical and problem-solving skills.
  - Strong written and verbal communication skills.
  - Ability to work independently and as part of a team.
-
