募集要項

Position: Infotainment onsite team deployment

Location: Katsuta

Language: N2 and above

Job Description:

- Design, develop, and maintain navigation software components for Automotive IVI systems.
- Collaborate with cross-functional teams (hardware, software, UX, QA) to ensure seamless integration and optimal performance.
- Develop and implement navigation features, including map data management, routing algorithms, POI search, traffic information, and voice guidance.
- Optimize navigation system performance for various hardware platforms and operating systems.

- Conduct thorough testing and debugging to ensure software quality and reliability.
 - Stay up-to-date with the latest automotive industry trends and technologies.
 - Adhere to development processes and coding standards.
-

スキル・資格

Qualifications:

- Bachelor's degree in Computer Science, Electronics Engineering, or a related field.
 - Proven experience in IVI development, with a strong focus on navigation systems.
 - Proficiency in C++ programming language.
 - Experience with embedded systems development.
 - In-depth knowledge of automotive industry standards (e.g., AUTOSAR, GENIVI).
 - Experience with UI/UX design for navigation systems.
 - Experience with map data formats (e.g., HERE, TomTom, Google Maps) is additional plus
 - Strong problem-solving and debugging skills.
 - Excellent communication and collaboration abilities.
 - Ability to work independently and as part of a team.
-
