日本での就労許可が必要です

### 募集要項

**Position:** Infotainment onsite team deployment

**Location:** Katsuta

**Language:** N2 and above

### Job Description:

- Design, develop, and maintain navigation software components for Automotive IVI systems.
- Collaborate with cross-functional teams (hardware, software, UX, QA) to ensure seamless integration and optimal performance.
- Develop and implement navigation features, including map data management, routing algorithms, POI search, traffic information, and voice guidance.
- Optimize navigation system performance for various hardware platforms and operating systems.

- Conduct thorough testing and debugging to ensure software quality and reliability.
  - Stay up-to-date with the latest automotive industry trends and technologies.
  - Adhere to development processes and coding standards.
- 

## スキル・資格

### Qualifications:

- Bachelor's degree in Computer Science, Electronics Engineering, or a related field.
  - Proven experience in IVI development, with a strong focus on navigation systems.
  - Proficiency in C++ programming language.
  - Experience with embedded systems development.
  - In-depth knowledge of automotive industry standards (e.g., AUTOSAR, GENIVI).
  - Experience with UI/UX design for navigation systems.
  - Experience with map data formats (e.g., HERE, TomTom, Google Maps) is additional plus
  - Strong problem-solving and debugging skills.
  - Excellent communication and collaboration abilities.
  - Ability to work independently and as part of a team.
-
