募集要項

Position: AUTOSAR Embedded BSP developer

Location: Tachikawa

Language: N3 and above

Job Description:

Responsibilities:

- Design, implement, test, and debug embedded software applications.
- Develop robust and efficient software solutions using C programming language.
- Collaborate with cross-functional teams to define software requirements and architecture.
- Optimize software performance and resource utilization.

- Conduct thorough testing and debugging to ensure software quality.
 - Adhere to development processes and standards.
 - Contribute to continuous improvement of development practices.
-

スキル・資格

Required Skills

- Proficiency in C programming language.
- Proven experience in embedded software development (design, implementation, testing, debugging).
- In-depth knowledge of real-time operating systems (RTOS), preferably QNX.
- Ability to read and understand English technical documentation.
- Excellent communication and interpersonal skills.
- Strong work ethic, including punctuality, reliability, and dedication.
- Ability to take ownership of tasks and deliver high-quality results.
- Demonstrated problem-solving and analytical skills.
- Positive and collaborative team player.

Desired Skills

- Experience in graphic driver or middleware development (OpenGL).
 - Experience in development processes compliant with automotive functional safety standards (ISO 26262, Automotive SPICE).
-
