### 募集要項

#### 【About the company ...】

The company is a software company whose corporate message is "Speed up your Business."

They accelerate their customers' businesses in various fields such as medical, manufacturing, finance, and entertainment by parallelizing and optimizing software to efficiently utilize multi-core processors and accelerating applications using new

memory technology that realizes power saving and high-speed IO, thereby achieving green IT.

## 【 Job Description 】

### 【Overview】

The company develops software that maximizes hardware performance for customers facing a variety of challenges, such as improving the performance of industrial equipment and financial systems, developing products with the latest flash memory, and commercializing automated driving and autonomous robots. The company leverages its low-layer software technology, algorithm implementation capabilities, and knowledge of various industries and research fields to provide customers with a high level of value that no other company can match.

### 【Responsibilities】

- Software development to realize automatic operation
- Development of robot systems for AGV/AMR, construction of data analysis environment, and development of data analysis software
- Consulting and development services in the field of mathematical optimization and software development for next-generation accelerators such as quantum computers
- NVMe SSD firmware development for data centers (embedded software development)
- Development of systems that utilize FPGAs as accelerators
- Image processing and image recognition software development for embedded devices (e.g. 4K8K devices, ADAS, medical image processing, inspection devices)
- Development of software and solutions using machine learning algorithms and deep learning technology
- Development of financial systems (derivative pricing)

### 【Job Satisfaction】

- You will work directly with customers and be involved in the next generation of technology and cutting-edge technology!
- The high level of engineers on staff makes it a great place to learn new skills, gain experience, and grow as an engineer.
- There are many projects where low-layer software technology can be utilized.
- Both technical and business career paths are available for software engineers.

---

## 【 Working time 】

Discretionary Work System

## 【 Welfare 】

- Full social insurance
- Commuting allowance
- Child allowance
- Recreation Assistance
- Training/Self Development Allowance Resident allowance of 30,000 yen/month
- Travel and accommodation expenses for company trips
