募集要項

The main tasks are as follows, but since we are a small group, you will be flexible in your response.

■Collecting and organizing information from manufacturers to provide information to doctors, planning content to convey product information and evidence, and creating promotional tools.

■Planning and managing an advisory board to create evidence on safety and effectiveness when used on Japanese skin, as well as combinations with various beauty treatments.

■Planning and managing research meetings, seminars, academic events, etc. / Planning and managing research meetings and seminars, as well as managing exhibition booths at academic events.

■Catch up on needs through communication with doctors. Search for market development seeds to expand product sales.

[Products in charge] In-house laser equipment and skinceuticals (scheduled to go on sale in October 2024)
