日本での就労許可が必要です

募集要項

Our mission is to create new value through smart energy management. We act as an intermediary between electric utilities and industrial and commercial electricity consumers, helping them reduce their procurement costs and grid stabilization costs and reduce their electricity bills. At the same time, we are making GX and DX proposals to expand the use of renewable energy and supporting our customers' decarbonization businesses.

Client Details

Our company is the Japan subsidiary of one of Europe's leading demand response service providers, formed as a joint venture with investment from TEPCO Energy Partner. Our mission is to create new value through smart energy management. We serve as an intermediary between electric utilities and industrial and commercial electricity consumers, helping them reduce procurement and grid stabilization costs while lowering their electricity bills. Additionally, we provide GX and DX solutions to promote the expansion of renewable energy and support our customers' decarbonization efforts. As a

leader in Japan, we have established business alliances with major utilities such as Tokyo Electric Power Company, Kansai Electric Power Company, Chubu Electric Power Company, and Chugoku Electric Power Company

Description

Project Management

- Manage project process planning to ensure that projects are on time, within budget, and to the satisfaction of clients (primarily large utilities) (quality and meeting deadlines)
- Oversees all phases of the project, from inception to initial framework, specification, development, testing, user education, and support for service launch
- Monitor project progress and address scope changes and issues
- Conduct regular check-in meetings with clients and internal teams
- Promote the use of project management software and tools and foster a "project management culture" within the EPJ
- Guiding and assisting team members in maximizing project management and selecting and adopting methods

Communication with clients

- Serve as the client's primary point of contact in connection with the project
- Communicate regularly to understand client needs and their expectations
- With the support of experts from our headquarters (France), we propose innovative solutions that support the client's vision, strategy and roadmap

In-house industry sector awareness

Analyze and identify electrification and flexibility (power regulation) potential through site monitoring and surveys

- Leverage industry sector expertise to improve project outcomes
- From time to time, we will expand our expertise in the relevant industry sector in-house

KPI

- Smooth execution of business operations
- Enlightenment of the Industrial Sector

Job Offer

Flexible environment with possible to WFH 4 days a week

Backup from TEPCO Energy Partner

Stable career

Growth potential

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Francois Fleury at +81 3 6832 8674.

スキル・資格

- Achievements in the industrial sector
- Proven track record in project management, including coordination of multiple stakeholders
- Effective communication with clients, including direct contact with clients to check progress and understand their needs.
- Excellent organizational formation and project management skills
- Strong Leadership
- Excellent verbal and written communication skills
- Ability to monitor project progress and address issues effectively
- Business Level English
- Familiarity with project management software and tools is preferred
- Those who sympathize with the core values (autonomy, engagement, competence) of Energy Pool Japan and have an attitude to put them into practice
- Those who have a sense of ownership and can work with the team with a sense of self-initiative and open-mindedness
