## 募集要項

This role involves managing product and project development for catalog platform and product master-related initiatives, including defining requirements, coordinating with clients, and overseeing the development process. Responsibilities include product analysis, strategy planning, scope definition, stakeholder coordination, and managing project timelines, progress, and reporting.

## 企業情報

A global leader in e-commerce, fintech, digital content, and communications, renowned for its innovation work environment. Join us to be part of a forward-thinking company that offers vast opportunities for growth and development in a diverse and inclusive culture.

## 職務内容

## Project Management:

- Oversee issue management throughout the project.

- Manage development progress and timelines.
- Define project objectives and scope.
- Handle stakeholder management and negotiations.
- Provide regular reporting on project status.

Product Management:

- Plan strategies and create action plans.
- Prepare development-related documents such as specifications for engineers.
- Conduct product analysis, extract issues, and set hypotheses.
- Define requirements, development scope, and prioritize while coordinating with stakeholders (engineers, business departments).

条件・待遇

- Working time: 09:00-17:30
- Hybrid working style
