募集要項

You'll be responsible for designing, constructing, and sustaining resilient systems to support video distribution services, ensuring both stability and scalability across private and public cloud platforms.

Client Details

A prominent player in the global e-commerce industry, this company offers an exciting opportunity to work on cutting-edge technology projects with a strong global presence.

Description

- Develop and maintain BtoC systems using Kubernetes.
- Monitor, troubleshoot, and enhance infrastructure performance.
- Conduct non-functional testing under heavy workloads.
- Improve system performance by identifying and resolving bottlenecks.
- Set up Jenkins pipelines for streamlined deployment.

Job Offer

- Opportunities for long-term employment.
- Weekends and holidays off, with a 9:00-17:30 work schedule.
- Free meals for breakfast, lunch, and dinner.
- Professional development opportunities in a fast-paced, innovative environment.
- Work-life balance with flexible working hours.
- Collaborative, multicultural work culture.
- Access to cutting-edge technology and tools.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Naoko Toda at +81 3 6832 8648.

スキル・資格

- Minimum 2 years of experience in BtoC infrastructure management.
 - Proficient in Linux server administration.
 - Skilled in containerization technologies like Kubernetes and Docker.
 - Experience with public cloud operations (AWS, GCP).
 - Passionate about DevOps and SRE practices.
 - Language: business level Japanese is a plus but not required.
