### 募集要項

Top multicultural company is looking for network engineer who has responsibilities related to the design, and maintenance of network devices within a data center network that supports them.

**Client Details**

Our client is a vibrant and innovative global company that stands at the forefront of the digital economy. They are not just a company; it's a dynamic ecosystem that empowers consumers, fosters innovation, and embraces the future of digital services.

**Description**

- Create and design network layouts that meet organizational needs, ensuring scalability and efficiency
- Install and configure network hardware (such as routers, switches, and firewalls) and software, ensuring they function correctly within the infrastructure.
- Continuously monitor network performance, using tools to identify bottlenecks or issues and optimize the network for better efficiency.
- Diagnose and resolve network issues, including connectivity problems, hardware failures, and software conflicts, ensuring minimal downtime.

- Work closely with other IT teams, such as systems administrators, software developers, and cybersecurity professionals, to ensure seamless integration of network services in Japanese and English.

**Job Offer**

- A dynamic, energetic working environment with good work/life balance
- Open culture and job rotation available to enable internal career development
- Competitive salary and benefits package
- Opportunity for growth and advancement within the company
- Collaborative and supportive team environment
- Flexible work schedule and work-life balance

---

## スキル・資格

- Cisco Certified Network Associate (CCNA)
- Strong understanding of networking concepts, protocols (such as TCP/IP, DNS, DHCP), and architectures (LAN, WAN, VPN).
- Familiarity with network operating systems, such as Cisco IOS, Linux, and Windows Server.
- Effective verbal and written communication skills to collaborate with team members and explain technical concepts to non-technical stakeholders.
