募集要項

1. Develop and maintain automated test scripts using Selenium WebDriver with Java.
2. Write reusable and reliable code for test automation.
3. Integrate automated tests into the CI/CD pipeline using Jenkins.
4. Ensure that automated tests are run as part of the build process.
5. Use GitHub for version control to manage and track changes in test scripts.
6. Collaborate with team members through pull requests and code reviews.
7. Identify, document, and track bugs using a bug tracking tool.
8. Work closely with developers to reproduce and resolve issues, QA engineers, and other stakeholders to ensure quality.
9. Participate in daily stand-ups, sprint planning, and retrospectives.
10. Continuously learn and improve your skills in test automation, CI/CD, and version control.
11. Stay updated with the latest trends and best practices in test automation.
12. Good communication and teamwork abilities.

13. Attention to detail and a proactive attitude.
