募集要項

We are seeking a Bilingual Test Analyst with expertise in Selenium automation. In this role, you will develop, maintain, and integrate automated test scripts into CI/CD pipelines, collaborating with global teams to ensure high-quality software delivery.

Client Details

Our client is a leading multinational IT services company, known for providing comprehensive solutions that modernize technology and reimagine business processes. With a focus on driving digital transformation, the company supports industries worldwide by leveraging cutting-edge technologies and fostering innovation. Employees number in Japan is 1,000+ people, 50% came from global background.

Description

- Develop and maintain automated test scripts using Selenium WebDriver with Java.
- Plan and report automation status to clients, ensuring transparency and progress tracking.
- Collaborate with team members through code reviews and pull requests using GitHub.

- Integrate automated tests into CI/CD pipelines using Jenkins, and ensure seamless execution during the build process.
- Identify, document, and track bugs, working closely with developers and QA engineers to resolve issues.
- Participate actively in agile ceremonies such as daily stand-ups, sprint planning, and retrospectives.
- Stay updated with the latest trends in test automation to enhance processes continuously.

Job Offer

- Competitive salary package based on experience and skills.
- Opportunity to work in a fast-paced, international environment.
- Gain hands-on experience with advanced testing tools and frameworks.
- Collaborative and inclusive work culture that fosters growth and innovation.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Mana Chuabangon +81 3 6627 6080.

スキル・資格

- **Language**: Business-level proficiency in both English and Japanese (JLPT N2 equivalent or higher).
- **Experience**: 3+ years in testing, with 2+ years in Java and Selenium WebDriver, or 6+ year for senior level.
- **CI/CD Expertise**: Familiarity with Jenkins pipelines and GitHub version control.
- **Preferred Skills**: Knowledge of AI-based testing frameworks, Python, and Playwright is a plus.
