

## AI Engineering Manager

## AI Engineering Manager

## 募集職種

## 人材紹介会社

ネクスト・ムーブ 株式会社

## 採用企業名

Cogent Labs

## 求人ID

1502530

## 業種

ソフトウェア

## 会社の種類

中小企業 (従業員300名以下)

## 外国人の割合

外国人 半数

## 雇用形態

正社員

## 勤務地

東京都 23区

## 給与

経験考慮の上、応相談 ~ 1700万円

## 更新日

2024年11月11日 16:18

## 応募必要条件

## 職務経験

3年以上

## キャリアレベル

中途経験者レベル

## 英語レベル

ビジネス会話レベル

## 日本語レベル

ビジネス会話レベル

## 最終学歴

短大卒：準学士号

## 現在のビザ

日本での就労許可が必要です

## 募集要項

## Job Responsibilities:

- **Leadership & Team Empowerment:** Lead, mentor, and manage a diverse, high-performing team of engineers, scientists, and researchers. Foster a culture of collaboration, innovation, and growth within the team.
- **Cross-Functional Collaboration:** Work closely with product, data science, and engineering teams to drive alignment on the AI product roadmap and ensure successful delivery of business outcomes.

- **AI Model Development & Deployment**: Oversee the end-to-end development lifecycle of AI models, including data collection, labeling, model development, experimentation, training, testing, and deployment into production environments.
  - **Best Engineering Practices**: Ensure that best practices in coding and engineering are maintained, prioritizing a robust, scalable, and efficient codebase.
  - **Pipeline & Experiment Management**: Develop, maintain, and optimize AI model training pipelines and experiment tracking systems. Ensure the seamless flow of data through the system and timely feedback on model performance.
  - **Operational Excellence**: Manage the deployment, scaling, and maintenance of AI models in production, working to ensure the systems are reliable, scalable, and continuously optimized.
- 

## スキル・資格

### Required Qualifications:

- 3+ years of experience in managing teams of engineers, scientists, or researchers, with a strong track record of driving successful AI projects.
- Hands-on experience in designing, implementing, and deploying machine learning models in production environments, with a focus on business applications.
- Strong communication and collaboration skills, with the ability to work effectively with cross-functional teams and business leaders.
- Proficiency in modern software engineering practices, including writing clean, maintainable, and well-documented code.

### Desired Qualifications:

- Practical knowledge of MLOps principles and technologies (e.g., model versioning, deployment at scale, containerization, continuous integration/delivery).
- Familiarity with cloud platforms (e.g., AWS, Google Cloud) and container orchestration tools (e.g., Kubernetes, Docker).
- Experience with Python (e.g., FastAPI, PyTorch, and related libraries), and modern database systems (e.g., SQL, NoSQL).
- Experience in building and optimizing large-scale data pipelines and AI model training systems.
- Knowledge of the Japanese language is a plus.

### Team Culture & Expectations:

- **Collaboration**: We emphasize teamwork, and engineers are expected to collaborate effectively across functions, sharing knowledge, and empowering each other.
  - **Ownership & Accountability**: Engineers are encouraged to take ownership of their projects, ensuring successful delivery while being proactive about resolving challenges.
  - **Innovation & Experimentation**: Engineers have the opportunity to experiment with new technologies and ideas, contributing to continuous innovation and improvements in our AI models and products.
  - **Quality**: We maintain a high standard of code quality, always striving for excellence and continuous improvement. Engineers are expected to deliver reliable, high-performance solutions.
  - **Customer-Focused**: We value both internal and external customers. Engineers should prioritize delivering value to end-users while also supporting colleagues and contributing to the broader company mission.
-
