募集要項

Seeking a team member to focus on client connectivity and low latency trading platforms for our electronic trading division. This position presents a vibrant combination of technical and business challenges, allowing for a deep understanding and practical experience with the company's trading technologies and operations.

Client Details

This prominent financial institution is a global leader in investment banking, wealth management, and institutional securities, serving a diverse range of clients including corporations, governments, and individuals. It has established a reputation for excellence and innovation in financial services, with a strong commitment to sustainable investing and community impact.

Description

- Work as part of a team to provide and manage production for electronic trading systems and client connections.
- Take initiative in identifying and implementing automation opportunities company-wide; define and create automated solutions for deployment, management, and monitoring of our service offerings.

- Troubleshoot problems across all areas of technology, including hardware, software, applications, and networks.
- Represent the team in design reviews and readiness checks for new and existing services.

Job Offer

- Open and international workplace
- Competitive salary

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Hikari Takamura on +813 6832 8903.

スキル・資格

- SQL/Linux/Shell scripting/Python skills
 - Business-level Japanese and English language fluency
 - Knowledge of Financial markets preferable
