## 募集要項

Our client is an international trading, domestic wholesaling and distribution company in the automotive industry. They are currently looking for a Product Engineer (CREO) to perform design and development tasks using CREO software, including creating detailed 3D models, conducting engineering analysis and ensuring that products meet industry standards and client specifications.

## Job Description:

- Develop new products and improve existing products with a focus on automotive filters.
- Design and develop quality products ensuring manufacturability in collaboration with other engineering functions.
- Translate customer requirements into product drawings and specifications, including design analysis, verification, and tolerance analysis.
- Prepare prototype samples with production and quality teams during the design development stage.
- Enhance product designs to reduce manufacturing costs.

## Job Requirements:

- Bachelor's degree in mechanical/Mechatronics Engineering or related field.
- **Proven experience with Pro-Engineer (CREO) or similar CAD software.**
- **At least 2 years of experience in product development and manufacturing processes.**
- Strong project management skills with the ability to handle multiple projects.
- Excellent communication and teamwork skills; ability to collaborate across cultural and organizational boundaries.
- Additional language required in order to deal with overseas customer

- Fresh graduates are encouraged to apply
