### 募集要項

#### Company Profile

- A European-headquartered data analytics firm that helps its customers make better decisions by using AI to give context to their data.

#### The Role

- Act as a bridge between technology and business by turning data into actionable insights, designing user-friendly models, scoring systems, and visualizations.
- Work with stakeholders to understand and solve real-world problems, helping clients find the best technical and business solutions.
- Collaborate with internal teams to develop new features, improve existing products, and share best practices.
- Test solutions with investigator teams to ensure they meet client needs and refine them for maximum impact.
- Be the main point of contact for clients and developers, helping end users adopt and use new solutions effectively.

#### Your Skills

- Fluent in Japanese-- you will be working directly with customers, so 敬語 / formal language will be needed.
- Ability to work independently, make decisions confidently, and seek support when needed.
- Strong skills in business analysis and managing requirements.
- A natural problem solver who asks the right questions to uncover key insights.
- Excellent at working with teams and explaining technical concepts to non-technical audiences.
- Proactive, analytical, and driven to connect technology with business goals to create value.

### Location

Tokyo

### Salary

10 - 17 million yen

### Selling points

- Work remotely from outside Japan for up to 2 months each year.
- Engage in a global work environment, communicating frequently with the head office and international teams, as well as local Japanese customers.
- Benefit from excellent in-house training on the company's platform and services, equipping you to provide top-notch customer support.
- Collaborate on cutting-edge technology developed by former Google engineers.
- Tackle real-world business challenges with impactful solutions.
- Be part of a fast-paced, global team that values code quality, innovation, and collaboration.
