募集要項

We are seeking a motivated Front-End Web Developer who is eager to merge design with programming to build cutting-edge, scalable, and reliable systems. In this role, you will collaborate with UI/UX designers and engineers to translate wireframes into functional code, bridging the gap between design, user needs, and technical execution.

Client Details

This major Japanese technology conglomerate, operates the largest e-commerce platform in Japan, offering a marketplace for merchants to create customizable storefronts. Beyond online retail, it has diversified into financial services, digital content, and telecommunications, creating a robust ecosystem that enhances customer loyalty through its innovative points system.

Description

- Analyze business requirements and deliver high-quality features quickly and efficiently.
- Develop, test, and deploy new user-facing features for large-scale e-commerce systems, making technical decisions in complex situations.

- Create reusable, efficient code and libraries, and introduce innovative ideas for system improvements, such as refactoring and optimizing JS performance.
- Contribute to the adoption of new technologies and appropriate system architectures for better performance and scalability.

Job Offer

- Long-term renewable haken contract
- Potential to covert permanent employee in the future
- Competitive salary
- Attractive benefits
- International work environment
- Work hours: 9:00~17:30 Monday to Friday

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Hikari Takamura on +813 6832 8903.

スキル・資格

- Proven success in front-end development experience with HTML, CSS, JavaScript, working with React, Redux, and TypeScript.
- Proficient in using Web APIs (REST, JSON, CORS) and handling asynchronous processes (AJAX, Promise, WebSockets, WebWorkers).
- Hands-on experience with Linux, including investigation and operational tasks.
- Expertise in software configuration management tools like Git for version control and Jenkins for build management.
