### 募集要項

As a Project Manager you will be responsible for overseeing the planning, execution, and completion of various projects within our organization. You will work closely with cross-functional teams, ensuring that projects are delivered on time, within scope, and within budget. Your role will involve coordinating resources, managing stakeholders, and mitigating risks to ensure project success.

#### Mandatory skills :

1. Project Management: Proven experience in successfully managing end-to-end project lifecycles.
2. Leadership: Ability to lead cross-functional teams, set clear goals, and motivate team members to achieve project objectives.

3.Communication: Strong verbal and written communication skills. Ability to effectively communicate project updates, issues, and resolutions to both technical and non-technical stakeholders.

4.Problem-Solving: Excellent problem-solving skills with the ability to make quick decisions and resolve issues as they arise during the project.

5.Organization: Exceptional organizational skills to manage multiple tasks and projects simultaneously.

6.Adaptability: Flexibility to adapt to changing project requirements and priorities.

7.Risk Management: Proven ability to identify and mitigate project risks to ensure successful project delivery.

8.Reporting Ability: Exceptional reporting ability for senior executives, providing clear and concise updates on project progress, challenges, and achievements.

9.PPT Design Skills: Proficiency in designing compelling and visually appealing PowerPoint presentations to convey project information effectively.

Good to have :

1.Certifications: Project Management Professional (PMP) or similar certifications would be an advantage.

2.Industry Knowledge: Familiarity with the e-commerce or technology industry.

3.Agile Methodology: Experience in working with Agile methodologies and frameworks.

4.Client-Facing Skills: Ability to build and maintain strong relationships with clients or external stakeholders.

5.Technical Background: Basic understanding of software development or IT infrastructure.

6.Innovative Thinking: Ability to bring innovative ideas to improve project processes and outcomes.

7.Quality Assurance: Knowledge of quality assurance processes to ensure project deliverables meet high standards.
