## 募集要項

## ROLE AND RESPONSIBILITIES

- Design and develop web applications using modern technologies (HTML, CSS, JavaScript, React, Angular, or Vue).
- Utilize Microsoft products (Azure, O365, Power Automate, Power BI) for application deployment.
- Integrate applications with SharePoint, Windows apps, and third-party services.
- Collaborate with cross-functional teams to prioritise project requirements.
- Working closely with cross-functional teams, you'll analyse ongoing business needs, pinpoint opportunities for enhancement, and execute solutions to elevate the functionality, speed, and dependability of our systems.
- Write clean, efficient code following best practice.
- Troubleshoot and optimise applications.
- Stay updated on industry trends and emerging technologies.
- Engage with corporate initiatives such as Lessons Learnt and internal Training.
- Maintain awareness and compliance with Health, Safety and Environment (HSE) policies and procedures in accordance with best practice and legal requirements.
- Understand and apply Business Policy.

## Requirement

- At least 5+ years of full-stack development experience.
- Prior work in an IT environment.

- Proficiency in at least one programming language (C#, Java, Python, or JavaScript).
- Familiarity with front-end frameworks (React, Angular, or Vue) and backend frameworks (.NET, Node.js, or Django).
- Hands-on experience with cloud platforms (Azure, AWS, or Google Cloud)
- Power Platform: Power Apps development, Power BI dashboard creation, and data modelling.
- Microsoft Azure/Office 365: Cloud services, Azure Functions, Azure DevOps.
- SharePoint: Development, customization, and integration.
- Self-motivation and ability to work independently.
- Strong customer-oriented approach to service management.
- Exceptional problem-solving and decision-making capabilities.
- Excellent interpersonal and relationship-building skills.
- Clear and effective communication, both written and verbal.
- Commitment to continuous improvement and process innovation
