募集要項

COMPANY OVERVIEW

Leading integrated telecommunications provider in Malaysia looking for Solution Architect to be focused on private cloud solution sales and technical support for key projects in the Asia Pacific region.

JOB RESPONSIBILITIES

- Take charge of private cloud solution sales and technical support for key projects in the Asia Pacific region, including customer survey, requirement analysis, solution planning and design, customer communication and demonstration, PoC test, bidding and reply, and continuous operation.
- Based on the requirements of key industries, to build a series of scenario-based solutions such as national AI cloud, government big data, financial infrastructure, financial intelligent data lake, and digital cloud platform for oil, gas and power, etc.

- Based on customer requirements and industry development trends, drive key products and features to be incorporated into R&D roadmaps, work with partners to provide customers with comprehensive solutions, and provide competitive cloud foundation and solutions for key customers' digital transformation, application modernization, and business innovation.

JOB REQUIREMENTS

- Have IT knowledge and experience in data center, server, storage, network, virtualization, and cloud.
- Familiarity with one or more technical fields in the IaaS, PaaS, database, container, security, big data, and AI fields is preferred.
- Experience in consulting, design, or delivery of large-scale IT projects/cloud computing projects is preferred.
