募集要項

We are seeking a talented Fullstack Golang Developer for an engaging full-time role in Tokyo. The ideal candidate will be responsible for developing and designing front-end web architecture, ensuring the responsiveness of applications, and working alongside graphic designers for web design features.

Client Details

With a significant presence in Tokyo, this international IT company is committed to providing innovative technology solutions that drive their business forward.

Description

- Develop front-end website architecture.

- Design user interactions on web pages.
- Create servers and databases for functionality.
- Ensure cross-platform optimization for mobile devices.

Job Offer

- Long-term renewable haken contract
- Potential to convert permanent employee in the future
- Competitive salary
- Attractive benefits
- International work environment
- Work hours: 9:00~17:30 Monday to Friday

If you are a skilled Fullstack Golang Developer looking for a stimulating role in Tokyo, we encourage you to apply today.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Hikari Takamura on +813 6832 8903.

スキル・資格

A successful Fullstack Golang Developer should have:

- Proven experience in working with Go (Golang)
- Proficiency in fundamental front-end languages such as HTML, CSS, and JavaScript.
- Familiarity with JavaScript frameworks such as Angular JS, React, and Amber.

会社説明
