募集要項

Position: QA Engineer
Location: Bangkok (Suanluang)

JAC Recruitment is partnering with one of the leading Automotive companies to identify a highly qualified candidate for the QA Engineer position. The company is expanding its development team and is focused on leveraging cutting-edge technologies to drive business growth.

If you are interested, please review the detailed job description below.

Responsibilities:

- Develop and implement comprehensive test plans and strategies for manual and automated testing of web applications

- Design, develop, and maintain automated test scripts for both frontend and backend using industry-standard tools and frameworks in JavaScript/TypeScript.
- Identify, report, and track defects, working closely with developers to reproduce and resolve issues.
- Collaborate with product managers, developers, and other stakeholders to ensure timely delivery of high-quality products.
- Continuously improve QA processes and methodologies by researching and implementing new tools and techniques .

Required Qualifications:

- Bachelor's degree in Computer Science, Information Technology, or related field.
- 3+ years of experience in software quality assurance, with a focus on web application testing.
- Strong knowledge of manual and automated testing techniques, methodologies, and best practices.
- **Experience writing JavaScript/TypeScript automated tests for frontend and backend and API Testing.**
- Experience with industry-standard test automation tools and frameworks.
- Strong communication in English and Thai.
- Excellent problem-solving, analytical, and critical thinking skills.
