募集要項

Our client, a global leader in e-commerce and digital services, is looking for security engineer. This role involves working closely with the global security team to support security projects.

Client Details

Our client is global technology company, known for its e-commerce platform, online banking, digital content, and telecommunications services.They operates in multiple countries, so understanding cultural differences and multilingual support might be beneficial.

Description

- Assist in managing vulnerabilities post-assessment, ensuring timely remediation or risk acceptance to minimize security gaps.
- Collaborate with development and security teams to proactively identify and mitigate potential risks, enhancing overall system security.
- Coordinate meetings, communications, and documentation for both security and development teams, ensuring smooth collaboration and efficient decision-making.
- Simplify and communicate security concepts to both technical and non-technical stakeholders, ensuring

    understanding across all levels of the organization.
- Support the team with various assigned tasks, providing key logistical assistance to streamline department operations and enhance productivity.

Job Offer

- A dynamic, energetic working environment with good work/life balance
- Open culture and job rotation available to enable internal career development
- Competitive salary and benefits package
- Opportunity for growth and advancement within the company
- Collaborative and supportive team environment

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Ayaka Iwaki at +81 3 6832 8658.

スキル・資格

- Understanding of networking protocols (TCP/IP, HTTP, DNS, etc.), firewalls, routers, and switches.
- Understanding of common security principles (confidentiality, integrity, availability).
- Good skill to collaborate with various teams, such as development, IT, and compliance teams, so teamwork skills are vital.
