募集要項

Company Profile

- We are seeking a Senior Software Engineer to join our client, a dynamic and innovative company that's revolutionizing the manufacturing industry. They are a rapidly growing tech firm that's transforming how manufacturers handle design data and supply chain operations.

The Role

- As a Senior Software Engineer in the Core Engineering team, you will play a crucial role in enhancing developer productivity and improving our development environment. Your work will focus on providing tools and infrastructure that reduce cognitive load on developers by "separating concerns."
- Developing tools and infrastructure to enhance developer productivity
- Collaborating with cross-functional teams to deliver high-value solutions

- Improving development processes and environments
- Backend: Rust, TypeScript, Node.js
- Machine Learning/AI: Rust, Python, Vertex AI, PyTorch, OpenCV, TorchServe, Elasticsearch
- Infrastructure: GCP, Kubernetes
- DevOps: GitHub, Terraform
- Data: PostgreSQL, BigQuery, dbt, Alloy
- Communication: Slack, JIRA

Your Skills

- Solid hands-on software development experience (At least 7 years)
- A track record of leading engineering initiatives as Senior Engineer or Tech Lead
- Expertise in web application development using strongly-typed languages
- Excellent communication skills in either English or Japanese
- Needs to be located in Japan at time of applying
- Containerization technologies like Kubernetes
- Infrastructure-as-Code practices
- Experience in Rust
- Leading on architectural level and design of entire systems including implementation
- CI/CD pipeline design and implementation
- Cloud platforms, particularly GCP
- Data engineering and ETL processes
- Conversational-level Japanese proficiency

Location

Tokyo

Salary

7 - 12 million yen

Selling points

- Solve challenging problems alongside an enthusiastic team.
- You will contribute to not only local but also international product development
- Contribute to products that have the potential to change the manufacturing landscape.
- Opportunity to be involved on system level projects that has big impact to the overall business
- Work in a multinational environment where all technical meetings are conducted in both English and Japanese
- Enjoy flexible remote work options with occasional in-office days for team interaction.
- As half of the employees are parents and the company offers great work life balance to support them
