## 募集要項

## 【About the Company】

The company's mission is to "make all contract risks controllable."  
To achieve this, the company is currently developing the following businesses

## 【Business Description】

- (1) Development and operation of AI contract review platform "LegalForce"
- (2) Development and operation of AI contract management system "LegalForce Cabine"
- (3) Operation of "Contract Watch," a contract-related information media

The company's economic activities consist of a variety of contracts, large and small, entered into by consumers and businesses.

At the same time, this means that "contract risks such as unfavorable terms and conditions and violations of laws and regulations are latent.

The company combines the latest technology with legal expertise to make contract risks visible and controllable. To ensure that rights are properly protected and unforeseen events are prevented. And to create a more prosperous and trusting economic society.

### **[Job Description]**

The company is currently planning and studying the development of a new product in a new business area with a completely new concept. They are looking for a person who can join as a lead engineer for the team.

The company continues to grow by providing new value to the market in the legal and contract area, including an AI-based contract review function. The company has developed and provided services centered on "LegalForce (released in April 2019)," an AI review service that focuses on issues in the review phase before concluding contracts, and "LegalForce Cabine (released in January 2021)," an AI contract management system that supports the contract management phase after concluding contracts. The services have received a great deal of positive feedback.

On April 15, 2024, they launched a new service, AI legal platform "LegalOn Cloud," which comprehensively supports the entire legal industry, not just contract work, based on the contract review and contract management areas that "LegalForce" and "LegalForce Cavine" focused on.

In 2023, the company entered the U.S. market and launched a new product called DecideOn in the decision-making and governance area. They continue to grow and provide new value to the market.

This is the fourth new market and area we are challenging, following the legal and contracts area, the US legal tech market, and the decision-making and governance area.

If you are interested, please apply.

### **[Your Role]**

#### ■Issues/Mission

Lead the design and 0 → 1 development of complex and huge systems with a view to the complete system.
