募集要項

Job Description:

- We plan, design, build, and migrate to optimize our clients' entire IT infrastructure environment on the cloud.
- Utilizing advanced technology and knowledge of the cloud (AWS, Microsoft Azure), we provide support as members who are well-versed in the overall cloud infrastructure architecture and the various services offered by public clouds.
- Pre-consultation regarding cloud environment allocation and handling requests for cloud infrastructure provision
- Operational design and implementation in hybrid/multi-cloud environments

- Plan, design, build, and migrate to optimize the entire IT infrastructure environment of our clients through the cloud.
- Use advanced technology and knowledge of the cloud (AWS, Microsoft Azure) to provide support as a member who is familiar with the overall cloud infrastructure architecture and various services provided by public clouds.
- Pre-consultation on the allocation of cloud environments, and serve as a liaison office for requests to provide cloud infrastructure
- Design and implement operations in hybrid/multi-cloud environments

スキル・資格

Features:

- Experience in requirement definition, design, development, testing, and operation, regardless of whether it is on-premise or cloud.
- Knowledge and experience in designing and building the entire cloud technology infrastructure architecture
- Consideration and implementation of cloud native solutions
- Experience in technology evaluation and selection that considers not only functional requirements but also non-functional requirements (availability, performance, security, cost, etc.)
- OS skills (Windows server, Linux)

Japanese: Native level Japanese (Japanese Language Proficiency Test Level N), business level English

Qualification:

- Experience in defining requirements, design, development, testing, and operation, regardless of whether on-premise or on cloud
- Knowledge and experience in designing and building the architecture of the entire cloud technology infrastructure
- Considering and implementing cloud-native solutions.
- Experience in technical evaluation and selection that takes into account not only functional requirements but also non-functional requirements (availability, performance, security, cost, etc.)
