募集要項

As a Data Engineer, you will be instrumental in supporting data-driven decision-making for our logistics services. You'll design, develop, and maintain data pipelines and ensure the integrity of critical data used to optimize logistics operations and improve customer experiences.

Client Details

Our client is a leading company in the logistics sector, specializing in the development and optimization of supply chain solutions. They operate extensive warehouse networks and are focused on utilizing advanced technologies to enhance operational efficiency and improve customer satisfaction across various industries.

Description

- Design, develop, and maintain scalable data pipelines and ETL processes for data integration and transformation.
- Collaborate with data scientists, analysts, and other stakeholders to deliver high-quality data solutions.
- Implement data quality checks to ensure accuracy and reliability of data.

- Optimize data processing workflows for performance and cost-efficiency.
- Manage and maintain data storage solutions on Google Cloud Platform (GCP), including BigQuery, Cloud Storage, and other relevant services.

Job Offer

- Long-term renewable haken contract.
- Potential to convert to a permanent employee in the future.
- Competitive salary and attractive benefits.
- International work environment.
- Work hours: 9:00~17:30 Monday to Friday.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Hikari Takamura on +813 6832 8903.

スキル・資格

- Proven experience of development experience with Python and SQL.
- Proven experience in data processing, analysis, or related fields.
- At least 1 year of cloud experience (preferably GCP).
- Strong communication skills, with the ability to engage and collaborate effectively with cross-functional teams.
- Knowledge of the logistics industry is a plus.

会社説明

Our client is a leading company in the logistics sector, specializing in the development and optimization of supply chain solutions. They operate extensive warehouse networks and are focused on utilizing advanced technologies to enhance operational efficiency and improve customer satisfaction across various industries.
