募集要項

We are seeking a dedicated Demand Planning Manager (individual contributor) to optimize supply chain operations within the Life Science industry. The successful candidate will have a strong skill set in SAP and the ability to actively improve our demand planning process.

Client Details

The company is a large organization operating within the Life Science industry. They are committed to introducing innovative solutions to market, with a strong presence in Japan.

Description

- Leading and optimizing demand planning operations.

- Utilizing strong SAP skills to improve overall efficiency.
- Actively enhancing the demand planning process.
- Ensuring the effective coordination of supply chain activities.
- Collaborating with cross-functional teams for process improvement.
- Building and maintaining relationships with suppliers and stakeholders.
- Overseeing inventory management and control.

Job Offer

- A competitive salary in the range of JPY 9 million to JPY 12 million
- The opportunity to actively improve the demand planning process
- Strong potential for people management in the future
- A positive and innovative company culture

We encourage those who are passionate about life sciences and supply chain management to apply for this exciting opportunity.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Mike Corbyn on +813 6832 8601.

スキル・資格

A successful Demand Planning Manager should have:

- Proficiency in SAP
- Strong analytical and problem-solving skills
- Excellent communication and interpersonal skills
- Proven experience in procurement and supply chain management
- A deep understanding of demand planning processes
- A capacity for building and maintaining relationships with suppliers and stakeholders
- Ability to manage and lead a team

会社説明

The company is a large organization operating within the Life Science industry. They are committed to introducing innovative solutions to market, with a strong presence in Japan.
