募集要項

We are HIRING!
Currently, we are hiring an IT Infrastructure Engineer (Japanese Speaker), for a leading Japanese investment finance company based in Jakarta. This role will be crucial in supporting and maintaining company internal IT infrastructure & IT administration systems. Please find below details of the job criteria.

Requirements:

- Experienced as IT infrastructure, with hands on experience supporting company's IT related to administration systems.

- Experienced in packaging software/deployment solutions.

- Skilled in network infrastructure (Wi-Fi, LAN, computer, etc).

- A Japanese Speaker with experience communicating to Japanese expatriate. (Min. JLPT N3).

Job Description:

- Supporting internal IT administration systems.

- Resolve troubles & IT administration issues.

- Manage design, implementation, and maintenance of the internal IT infrastructure, including networks, servers, storage, and security systems.

- Communicate and engage directly with Japanese native to support related IT matters.

If you feel suitable for this position, kindly apply now & share this vacancy to any of your contacts who might be interested. Good luck!
