募集要項

【ABOUT THE COMPANY】

Based on the philosophy of "creating a society that does not have to worry about cyber security," the company is engaged in the security business, including various vulnerability assessments, and the system development business.

In system development, it is important not only to diagnose vulnerabilities after development, but also to design with security in mind from the design stage, and to conduct security checks during the development process.

【JOB DESCRIPTION】

▼About the Company
To realize a society that does not have to worry about cyber security, the company provides services such as design and development in system development, vulnerability assessment of web applications, smart phone applications and IoT devices.

In system development, it is important to consider security from the design stage and conduct security checks during the development process, rather than simply diagnosing vulnerabilities after development and feeling relieved.
In the system development business, they are making daily efforts to build a system that can achieve these goals.

The company is also expanding its operations by opening a head office in Kitakyushu and a Sendai office in May 2019, with the goal of creating an environment in rural areas that is as good as Tokyo in terms of salary and benefits, and becoming a U/I turn destination for people from the countryside and young people.

▼Recruitment Background
Based on the philosophy of "realizing a society that does not have to worry about cyber security," the company provides security services such as various types of vulnerability assessments and system development services.

In system development, it is important not only to diagnose vulnerabilities after development, but also to design with security in mind from the design stage, and to conduct security checks during the development process.

They are working hard every day to realize these goals in our system development business as well.
In addition, the company is expanding its operations with the opening of a Sendai office in May 2019.
Why don't you join and contribute to society by supporting the growth of companies by improving business efficiency through security measures and system development?

You will be able to participate in the start-up phase of a business that is expected to grow rapidly, leading to personal growth!
An environment where you can utilize the latest technology and tools and continue to learn constantly!
You can work in an environment that is as good as Tokyo in terms of salary and benefits!
You can develop in an environment where you can directly receive customer feedback!

▼Attractiveness and atmosphere of the company as a whole
An environment that values and supports the growth of each engineer's technical skills!
An environment conducive to personal growth, as you can participate in the start-up phase of a business that is expected to grow rapidly ◎
A workplace where you can utilize new technologies and tools and continue to learn constantly!
