募集要項

職務内容／Job duties

- ・ This position is responsible for strategizing and executing various projects, effectively managing initiatives by closely communicating with both domestic and international team members.
- ・ Responsibilities encompass a wide range of activities—from business process reengineering to system implementation—across both short-term and long-term timelines.

・ Typical Project Flow:

1. Collaborate with internal stakeholders to identify potential projects.
2. Develop project plans and secure necessary approvals.
3. Leverage internal and external resources to manage and execute projects.

【働き方】

- You will have the opportunity to drive significant organizational changes in a dynamic environment, making an impact across a rapidly growing company.
 - As an industry leader both domestically and globally, this organization fosters an entrepreneurial spirit and a proactive corporate culture within a highly flexible workplace.
 - By engaging in a wide range of projects and activities, you will develop a comprehensive perspective on business operations.
 - Through this experience, you will enhance both strategic thinking and practical execution skills, ultimately building your capabilities as a professional in business transformation.
-

スキル・資格

《必須条件》

- Over one year of hands-on experience in system design, development, or testing
- Over three years of project management experience on medium-to-large scale projects
- Experience working in or providing services to the investment management or financial services industry
- Business-level English proficiency (TOEIC 850+)
- Over eight years of professional experience

《希望条件》

- Experience working in or providing services across multiple industries
 - Experience in accounting or finance fields
 - Strong communication skills for smooth coordination and negotiation with internal and external parties
