募集要項

Company and job overview

Our client is an IT company.

Job Responsibilities
- Cooperate with the project manager (PM) and project development members, as well as analyze product specifications, specification changes, and new additional functions.
- Participate in developing projects as a Technical Specialist from Outline Design, Detail Design, Development/Implementation, Code review, Unit test, and Release stages.
- Design Database, develop functions, and support team members.
- Do other tasks as assigned by PM.

Job Requirements
- At least 2 years of experience working with Java in Web Application development projects.
- Experience working with the Spring or Spring Boot framework.
- Experience working with JUnit.
- Experience or knowledge of DDD (Domain-Driven Design) is a plus.
- Experience in code review.
- Good reading comprehension of English documents.
