募集要項

Join a market-leading global company as a **Senior IT Manager**, where you will play a pivotal role in shaping the company's technology. You will work with cross-functional teams and **lead software development projects** to enhance company's **Digital Payment Solutions.**

Client Details

Our client is a well-established French IT company operating in Japan, specializing in digital solutions for employee benefits. With a strong market presence and a commitment to innovation, the company is undergoing an exciting transformation to enhance its digital offerings and expand its services.

Description

- Lead and mentor the IT team, ensuring strategic alignment with business goals.
- Manage software development projects, overseeing delivery and implementation.
- Optimize cloud infrastructure costs and ensure scalable IT solutions.

- Oversee vendor relationships and negotiate contracts for technology services.
- Ensure IT security, compliance, and governance in collaboration with global teams.
- Develop and manage IT budgets, optimizing technology investments.
- Drive the integration of new payment solutions and strategic tech initiatives.

Job Offer

- Competitive salary and benefits package, reflecting your expertise and leadership skills.
- Hybrid work environment with flexibility to balance office and remote work.
- Career growth opportunities in a rapidly expanding global organization.
- Engage in high-impact projects, including integration with major payment networks.
- Work with a cutting-edge tech stack and contribute to large-scale digital transformation.
- A collaborative, innovative workplace with a strong focus on employee development.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Mana Chuabangon +81 3 6627 6080.

スキル・資格

- 5+ years experience in Project Management/IT Management of software development projects in a leadership role.
- Hands-on expertise in software development, project delivery, and solution architecture.
- Strong background in vendor management and budget management.
- Experience with .NET, SQL Server, Angular (front-end), and Azure cloud.
- Fluency in both Japanese and English is required.
- (Prefer but not required) Industry experience in payments or digital transactions.
