## 募集要項

An IT Indirect Procurement Manager is required to manage a small team and execute strategic purchasing initiatives within

the Life Science industry. The role is based in Tokyo.

#### Client Details

Our client is a large organization in the Life Science industry, renowned for its high-quality products and services. Operating globally, they are committed to innovation and are recognized for their contribution to the field.

#### Description

- Develop and implement IT procurement strategies
- Negotiate contracts and terms with vendors
- Work closely with internal stakeholders to understand their needs
- Manage a small team of 2-3 staff
- Continuously improve procurement processes
- Ensure compliance with company policies and procedures
- Monitor market trends and analyze their impact on procurement strategies
- Manage supplier relationships and evaluate their performance

#### Job Offer

- The opportunity to work from home up to 3 days a week
- A flexible work system in place
- The chance to manage a small team of dedicated professionals
- Be part of a respected organization in the Life Science industry

If you are a motivated individual with a passion for the Life Science industry, we encourage you to apply for this exciting opportunity.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Francesco Pedrielli at +81368328644.

---

#### スキル・資格

A successful IT Indirect Procurement Manager should have:

- A bachelor's degree or higher
- Experience in procurement within the IT department
- Strong negotiation and contract management skills
- Proficiency in English and Japanese
- Excellent team management abilities
- Understanding of the Life Science industry
- Proven track record in strategic purchasing initiatives
