## 募集要項

As a Site Reliability Engineer (SRE), you will be working closely with development teams to design, build, and maintain scalable systems while troubleshooting issues across the entire technology stack.

You'll also automate deployment processes, proactively address system reliability risks, and collaborate with global teams on operational readiness and system improvements.

## Client Details

This company is a prestigious global financial services firm known for its commitment to cutting-edge technology. With a legacy of providing first-class service to clients worldwide, the company operates in over 40+ countries and serves institutions, corporations, governments, and individuals across every major market.

By joining this company, you will be part of an organization that values professional growth, offering significant career advancement opportunities and an international, collaborative work environment.

## Description

- Collaborate with development teams to design, build, and maintain systems.
- Troubleshoot issues across the entire technology stack: hardware, software, application, and network.
- Automate deployment, management, and visibility of services.
- Identify and mitigate systems reliability risks.
- Participate in global team efforts and follow-the-sun operations.
- Represent the team in design reviews and readiness exercises for new services.

#### Job Offer

- Opportunities for career growth and professional development within a global organization, with exposure to international markets.
- Competitive salary and benefits package, along with a supportive and inclusive workplace that values diversity and collaboration.
- A dynamic, fast-paced work environment where you'll tackle exciting challenges and work with cutting-edge technologies.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Taishi Oyamada on +813 6832 8665.

---

#### スキル・資格

- Strong problem-solving skills with the ability to debug and troubleshoot complex issues.
- Interest in learning new technologies and solving hard problems with other teammates.
- Familiarity with automation tools like Ansible, GitHub, and/or experience with scripting languages such as Python, Bash, Perl, or Ruby.
- Experience with enterprise tools like AppDynamics, Grafana, Splunk, or Dynatrace is a plus.
- Fluency in English (No Japanese language skills are required for this position).
