### 募集要項

#### Company and Job Overview:

This company is a major player in the repair of aircraft parts and MRO Services. They provide unrivalled cost-efficient repairs with market benchmark quality. They are looking for a Process Engineer to join their team.

#### Job Responsibilities:

- In charge of process engineering aspects of any related repair component within the product portfolio and support to New Product Introduction (NPI) programs.
- Implementation & Introducing new repair processes into the production lines.
- In charge of creating and supporting Technical Work Instruction (TWI) and other related technical documents.
- Performing and supervising commissioning and acceptance of equipment and machinery.
- Developing detailed process procedures and/or compile the documentation for the individual repair process and

**Job Requirements:**

- Degree in Aerospace/Material Science/Mechanical/Manufacturing Engineering or its equivalent.
- At least 1 year of working experience as a Process Engineer or Mechanical Engineer.
- Working experience within an aviation environment is an added advantage.
- To be able to read technical material, develop analysis and make recommendations.

Apply online or feel free to contact me directly for more information about this opportunity. Due to the high volume of applicants, we regret to inform you that only shortlisted candidates will be notified. Thank you for your understanding.
